

## Sample Guiding Questions.

Pair these guiding questions with a matching book so that the students can use the book to apply the RADCAB model.

Note: I have used larger font so that you can simply print this page and cut the guiding questions to slip inside the matching books.

Be sure to choose books that will make the students think or “stretch” a bit. In other words, don’t choose books that will necessary answer all the questions! Also be sure to make some easier than others so that English Language Learners will have a chance to succeed.

As always, please choose guiding questions to fit your collection and your students. These are provided just as examples.

1. Is it possible to recycle old computers and cell phones?
2. What birds live in the world?
3. Has anyone ever seen a UFO?
4. Are there still Ninjas in Japan?

5. What happens to a Buddhist person when he or she dies?
  
6. How do people around the world celebrate Chinese New Year?
  
7. How do we know what dinosaurs looked like?
  
8. What ancient people painted the cave animals in France?

9. How do arctic animals survive the harsh conditions there?

10. What are the most recent discoveries in genetics?

11. What is futsal and how is it different from football (soccer)?

12. How can I make secret codes?
